Maximize the Value of Digital M&A with Enterprise Architecture

Maximize the Value of Digital M&A with Enterprise Architecture

Digital Experience & Automation

Modern business runs on technology, but many organizations are still treating technology as an afterthought in their mergers and acquisitions (M&A).

As technology increasingly becomes the “crown jewel,” enterprises must infuse their M&A programs with enterprise architecture capabilities that can evaluate targets, conduct due diligence, and perform integrations more effectively.

Organizations that leverage enterprise architecture best practices in their M&A programs will improve their results and gain an edge over their competitors.
